

Welcome to the 2015 Lunar Scorpion Moon Edition of the Noos-letter of the Foundation for the Law of Time

Welcome to the Lunar Scorpion Moon of Challenge! This is the second moon of the Planetary Service Wavespell, holding the power of polarity and stabilization.

For humanity, the crux and nexus of this evolutionary shift toward whole illumination is the need to tend properly to the biosphere. —Valum Votan

The biosphere is the life support system of our planet. Our whole ecosystem is dying due to habituation to the artificial 12:60 timing frequency. We, as a species, have deviated from Nature.

We live under toxic skies. Our water and soil is becoming contaminated. Our food is artificially manipulated. There is fluoride in the water. Droughts are increasing. Fires are raging. The ozone has been torn apart. Animals of land, air and sea are dying on a mass scale. Trees are dying. We are seeing radical extremes in weather.

There is much talk about global warming, as is being championed by Pope Francis, who has called for humanity to change its lifestyle and ways of consumption, stating that a great concentration of greenhouse gases is given off above all because of human activity. Is part of the human activity that he is referring to climate engineering: the deliberate and large-scale intervention in the Earth's climatic system?

Global geoengineering is completely disrupting the hydrological cycle, destroying the ozone layer (which is exposing all life on Earth to extreme UV radiation), and contaminating the entire surface of the planet with highly toxic bioavailable heavy metals and chemicals. Massive levels of radio frequency transmissions directly related to climate engineering are yet another layer of destruction which is radically affecting the trees, us, and the biosphere as a whole. It is imperative to wake the masses to our common plight.

—Dane Wigington, [www.geoengineeringwatch.org](http://www.geoengineeringwatch.org)

Everything is interconnected. What we do to the Earth we do to ourselves.

According to the Law of Time, what is now occurring within the biosphere is a volatile stage in its transition into the noosphere. The noosphere is Earth's mental sphere or thinking layer; it is the program of time on Earth. Presently the humans, as a whole species, are disconnected from the noosphere.

The totem animal for this moon is the scorpion, signifying a process of death and rebirth; a time of great transmutation of energies. In this Moon, stabilizing our clarity of mind is key. Educate yourself. Reflect. Stay close to the Source.

Only by fully manifesting the noosphere will the Timeship Earth be truly put back on course once again. The 13 Moon/28-day calendar is the perfectly designed instrument to make the noospheric leap into telepathy, the planetization of consciousness that establishes the daily reality of the noospheric mind.  
—Jose Arguelles, Time and the Technosphere

## Moons of the year White Planetary Wizard

In relation to the service wavespell of the year, that of the Red Magnetic Serpent, attracting the power of Life Force, and to the wavespell of the Blue Magnetic Eagle, attracting the power of Vision, this **Second Moon** relates to the second steps of the wavespells and their function of challenging the purpose through **the energy of the White Lunar Worldbridger, kin 106, and the Yellow Lunar Warrior, kin 236**

We can stabilize the energy through connecting different worlds and letting go while we embrace all polarities for the purpose of attracting new life force, being aware that we also need the courage of the warrior for a new vision. We will be supported in this task by the lunar skywalker, power of space, that will help us with being vigilant in the letting go and into creating a bridge to new opportunities and the power of dreaming of the night. In Aura-Soma these codes relate to Equilibrium 106, Archangel Ratziel, and Equilibrium 16, the Violet Robe Bottle, the paths of Tower Tarots, The Hierophant and The Pathfinder in the 20 Galactic Archetypes
