

Welcome to the Cosmic Turtle Moon of Presence, the 13th Moon of the 13 Moon planetary service wavespell, holding the power of cosmic transcendence.

As we make our way to the closing of the Yellow Galactic Seed year we are completing the first Light Gate in preparation for entry into the second. It is a time of synthesis and assessment as we prepare for the Red Solar Moon year: the year of emotional purification with the potential for supreme solar healing.

The Sun is the key that breaks the "spell of the Moon (of artificial time)". The Solar age arrives when we emerge as a collective from the Dark Age. Tibetan master Padmasambhava, who brought Buddhism from India to Tibet, predicted that the Dark Age would come with increasing cleverness. We see now that enmeshed in an artificial matrix, our minds run rampant and away from the center/Source while we come up with more and more ways to distract ourselves. Distract ourselves from what? From our own core essence.

Instead of looking inward to understand ourselves, we spend our free time in material pursuit and sensory pleasure. In the artificial world of the technosphere, we become desensitized by machines as compassion decreases and the meaning of our life evades us.

As the pace of our lives accelerates to keep up with technology, we find it harder to rest into the present moment. This creates a society that views things like meditation or spiritual practice as a frivolous activity and escapism from the "real world". When in fact it is in the meditative space of God-contact where all the solutions lie and where true reality is generated.

The Law of Time states that the biggest problem of the human race is alienation from nature: its own true nature which can be remedied by restoring the memory of the 13 Moons.

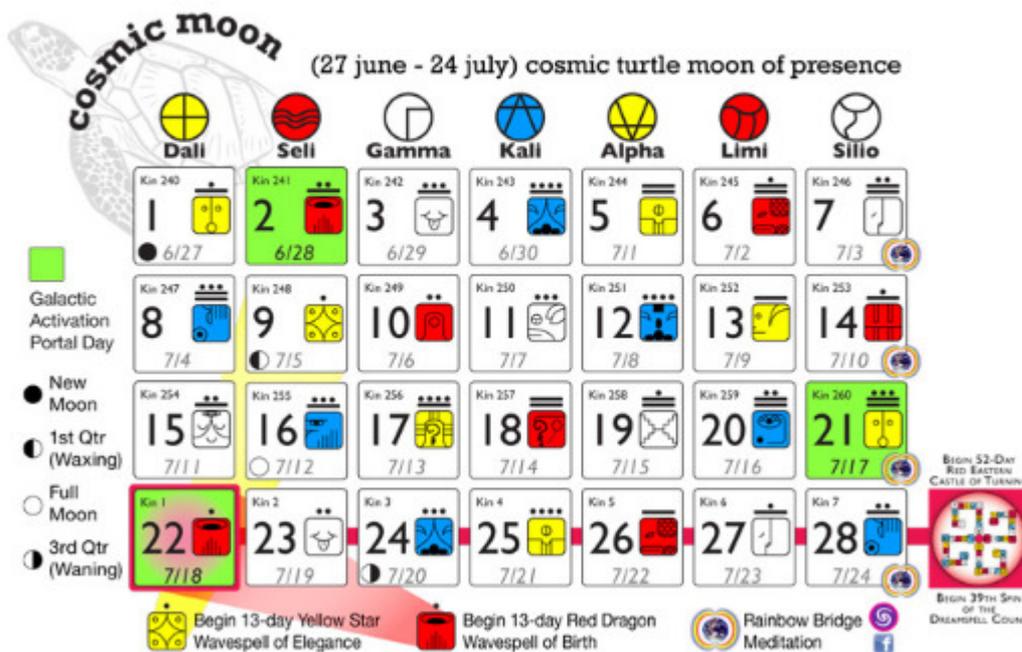

Time shapes space. 13 is the power of time; it is the feminine cycle that allows the 12 to circulate. Correct understanding of Time and Space is key to transforming our world.

The Seed of the New Beam has now been planted, but it is up to each of us to water our garden. This first step is to purify our minds and hearts from conventional beliefs so that the new light codes can penetrate our being.

The synchronic codes of the Law of Time help us to create more space in our minds so that our views and perceptions can become bigger and we can begin to see the patterns of our lives that underlie our conditioned behavior.

In the pulsar geometry, the thirteenth tone represents the conclusion of the fourth-dimensional time pulsar: tones 1-5-9-13, that ready us to take magic flight to open the Second Light Gate! This Moon is followed by the Day Out of Time, Kin 8, Yellow Galactic Star. Calling all Galactic Artists to harmonize, beautify and model art by organizing a Day Out of Time event or ceremony in your community.

Cosmic Moon-At-A-Glance

This Cosmic Moon begins with a New Moon. This demonstrates a synchronization of the fourth-dimensional galactic standard 28-day cycle with the third-dimensional synodic cycle. This synchronization does not occur every Moon, because the 3D synodic cycle is approximately 29.5 days long (and also varies slightly depending upon where you are observing from the Earth's surface).

Galactic Standard Time is not dependent on relative variables of different third-dimensional astronomical measures, which of course differ for every planet and celestial body. The relative measure of time on Earth in relation to the moon, sun, and other planet bodies is different than the measure of time on Mars, Jupiter or Uranus. The Galactic Standard Time utilizes a harmonic measure of the planetary orbit independent of any astronomical variables. The very nature of the harmonic measure 28 [a function of the formula 4:7::7:13] is a fractal which can be adopted anywhere in the galaxy and adapted to any orbit, hence Galactic Standard Time.

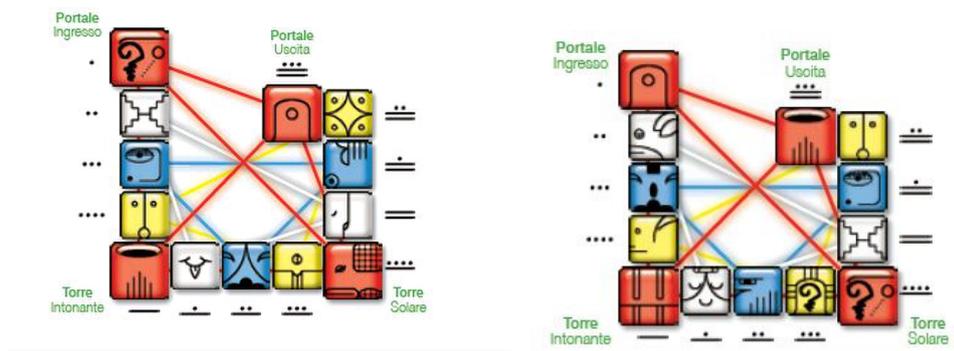

-Valum Votan, [Rinri Newsletter III, Volume 2, No. 2](#)

So this synchronization of the 28-day galactic standard cycle with the third-dimensional synodic lunar cycle can be seen as a symbol indicating the alignment or strengthening of the (re)integration of the third dimension with the fourth dimension on planet Earth, which is a major purpose of the 13 Moon calendar. “

Taken from the Noos-letter of the Law of Time

In relation to the 2 wavespells of the year, that of the Red Galactic Earth, attracting the power of navigation and being able to flow in synchronicity, and the wavespell of the Red Magnetic Moon, attracting the power of purification and the possibility to redeem the theft of Time, this thirteenth moon relates to the thirteenth step of the wavespells, the Red

Cosmic Moon and the Red Cosmic Dragon. We have the chance to endure in order to purify, transcending flow. At the same time we can be totally present in the nourishing energy of the Dragon, transcending being

As far as Aura-Soma is concerned we will connect to the Equilibriums 9, the Transcendental Heart, 1, the Physical Rescue, 13 Change in the New Aeon. We can go deep through the different layers of the heart and purify them, an inner journey on the path of the Hermit, to connect with our light and truth and start flowing in synchronicity. Bottle 1 will be a purification for the body while it nourishes the being. As Magicians we can start using all the elements and create, give birth to something new. B13 will bring light to the heart and help in transcending, opening up to a new level of letting go.
