

“Welcome to the Overtone Peacock Moon of Radiance! This is the fifth Moon of the Planetary Service Wavespell, holding the power of Overtone Radiance.

Earth's ecology appears to be on the verge of collapse. Earthquakes. Volcanoes. Radiation. Pollution of all kinds. Genetic manipulation. Overpopulation. Social unrest. Government shutdowns. What is going on?

"Though the present-day environmental and political chaos might look like an unmanageable aggregate of runaway forces and events, in actuality all that is occurring is the function of a larger program unfolding in a predictable evolutionary mutational sequence. This sequence is referred to as the biosphere-noosphere transition." —[“It's not a Biospheric Crisis, but a Noospheric Emergency”, Jose Arguelles/Valum Votan](#)

In the pulsar geometry, the fifth tone is the fourth-dimensional Command Tower, directing us to Empower Ourselves to a collective Return to Spirit this Moon!

We carry the blueprint of Paradise on Earth. The resurrection of our paranormal powers is at hand. The external world is dying. There is no time for doubts now. The illusory reality built on greed and acquisition must dissolve in the Light of Spirit. We are now experiencing the collective karmic results of our disobedience to nature's laws.

The totem animal for this moon is the peacock, signifying beauty and resurrection. Peacocks are sometimes associated with the resurrection of Christ and the eyes in the peacock tails represent the all-seeing Eye of Horus. Christ said “if thine eye be made single then thy whole body will be filled with Light.”

In this Moon we are being called to summon the Supreme Forces of Light, Truth and Divine Knowledge to overcome the forces of darkness.

Every thought we think has an electrical charge and creates a ripple effect. Our mind is directly connected to the electromagnetic field of the Earth. The Earth's electromagnetic field is directly connected to the Sun, with its system of sun spot cycles, solar flares and coronal mass ejections. The continuous bombardments of solar and cosmic radiation directly affect the biosphere and our mind.

This radiation sends forth a continuous stream of higher thoughtforms into our planet. These non-conceptual "thoughtforms" are called mentation waves. We want to open to receive these new mentation waves that are entering through a new Galactic Beam of consciousness. To do this requires a letting go of the old, taking responsibility for all of our thoughts and actions and making conscious effort to keep our mind saturated with the sacred, inspiring, HIGH thoughtforms.

The synchronic codes act as a bridge from our conditioned mind to noospheric mind. This Noospheric Mind is interactive and is knowable through self-reflective consciousness. It is the planet (Noosphere) that has the Mind, not us. To realize the noosphere is to enter Supreme Unity Consciousness.

"Considering Earth as a whole system, we must now take responsibility for the thoughts we create that charge the mental field or thinking layer of the Earth with the actual causes for everything that ails us and the planet today. Not only must we take responsibility for our own thoughts, we must also realize the relativity of our thinking and our assumptions in relation to everybody else's thinking and assumptions - and perhaps rethink our whole program."

—["It's not a Biospheric Crisis, but a Noospheric Emergency", Jose Arguelles/Valum Votan](#)

In this Overtone Moon we are called to Empower ourselves in the New Beam by keeping our thoughts exclusively on the Great Spirit and the Light of the New World Being Born."

Taken from the Noos-letter of the Law of Time

In relation to the 2 wavespells of the year, that of the Red Galactic Earth, attracting the power of navigation and being able to flow in synchronicity, and the wavespell of the Red Magnetic Moon, attracting the power of purification and the possibility to redeem the theft of Time, this fifth moon relates to the fifth step of the wavespells, the Red Overtone Dragon (kin 161) and the Red Overtone Skywalker (kin 213). We have the chance to empower in order to nurture our being and to explore commanding a wakeful presence

The fifth or Overtone position of the cycle is known as the time to take command and "gather resources" in order to irradiate the purpose to flow in synchronicity with the evolution of the earth, ready for the magic flight into the green castle of enchantment.

As far as Aura-Soma is concerned we will connect to the Equilibriums 1, 13 and 5. We can rescue our physicality, nurturing our being, and bring change to the new aeon through the illumination of the heart and its exploration. This helps us to open ourselves to joy in life and to utilize the vitality and available energy wisely
